SUMMARY

Motivated and detail-oriented Mechanical Engineering student with a focus on propulsion, seeking a summer internship to gain hands-on experience in Mechanical or Aerospace Engineering.

EXPERIENCE

Product Design

Dyno-Comp Performance Tuning

May 2024 - August 2024, Scottsdale, AZ

- Conducted 3D scanning of vehicles to develop customized aerodynamic packages which optimize airflow for better cooling and vehicle handling.
- Applied Computational Fluid Dynamics (CFD) analysis to validate the aerodynamic effectiveness of designs.
- Designed and 3D printed one-off parts to customer specifications.

Design and Fabrication (Part-time)

Accessory Partners

May 2023 - August 2023, Scottsdale, AZ

- Leveraged CAD software and 3D scanning technology to design and prototype custom automotive components including sunroof and suspension components
- Manufactured parts for automotive sunroofs in a shop environment
- Reverse-engineered parts which are no longer available for vintage vehicles
- Worked with colleagues to design application-specific jigs for ease of manufacturing

Data Entry Associate

Accessory Partners

February 2022 - September 2022, Scottsdale, AZ

- Collaborated with a team to input and manipulate large datasets
- Automated data formatting and organization using formulas and macros in Excel
- Gained an extensive knowledge of excel including functions and formatting

EDUCATION

Bachelor of Science in Mechanical Engineering (Current)

Embry-Riddle Aeronautical University • Prescott, AZ • 2024

- Concentration: Propulsion
- GPA: 3.89 | Expected Graduation: May 2026

RELEVANT COURSEWORK

ME309 – Air-breathing and Rocket Propulsion

ES206 - Fluid Mechanics

ES204 - Dynamics

EGR201 – Solidworks

EGR115 – Matlab

ES208 - Thermodynamics

SKILLS

Software - Solidworks (CSWA Certification), Fusion 360, Unity 3D, Excel, Word, Matlab

Technical - Welding, Fabrication, 3D Printing, 3D Scanning
